The IRS and the state departments of revenue have implemented automated processes for analyzing and reviewing tax returns. With this increased use of technology, the probability of receiving a letter or notice from a taxing agency has increased.

Our Audit Protection Plan is designed to minimize your worry should your return be audited or should you become victim to tax-related identity theft. With audit protection, you can feel assured that we will act on your behalf in front of state and federal agencies to fix the issue in a timely manner, with as little stress to you as possible.

---

Whether business or individual, here's what we'll do to help you through an audit:

- ✓ Assist with a resolution for tax-related identity theft issues with the IRS
- ✓ Correspond with taxing agencies in regard to audit notices or letters of inquiry relating to your income tax returns
- ✓ Facilitate any audit of your federal or state individual income tax returns
- ✓ Any of the above relating to a tax return of your dependents under the age of 18

The Audit Protection services fee for Form 1040 starts at \$100 and is calculated based on the complexity of the return. The fee for a corporate return is \$250. This pricing is limited to Illinois and Wisconsin filings. Ask your tax preparer for more information about this valuable service.

---

**With Audit Protection, you can breathe easy. We've got your back.**
